Address: Essen, Germany

About Myself

Computer Science student at FOM University of Applied Sciences (Essen) with hands-on experience in full-stack development and Android application development. Proficient in Java, Python, and modern web technologies, with a strong foundation in object-oriented programming, data structures, and REST API development. Experienced in designing and building scalable applications, including backend systems, database architecture, and responsive user interfaces. Currently seeking a working student (Werkstudent) or internship opportunity in software development in Germany.

Work Experience

Currently seeking a Werkstudent (working student) or internship position in software development; available up to 20 hours/week alongside academic commitments.

Education & Training

Currently seeking a Werkstudent (working student) or internship position in software development; available up to 20 hours/week alongside academic commitments.

Projects

QLess – Smart Shopping Android Application *Personal Project*

- Developed an Android application enabling users to compare product prices across stores and reserve items for in-store pickup.
- Designed application architecture and implemented features using object-oriented programming principles.
- Built an intuitive user interface following Material Design guidelines to improve usability and user engagement.
- Implemented efficient data handling and optimized application performance for smooth user experience.
- **Technologies:** Java, Android SDK, Git

CodingSols – Full-Stack Developer Community Platform *Personal Project*

- Developed a full-stack web application enabling users to post questions, share solutions, and participate in threaded discussions.
- Designed and implemented RESTful APIs for backend services, including user authentication, session management, and CRUD operations.
- Built a responsive frontend interface using modern web technologies to enhance user experience and accessibility.
- Designed and managed database schema for users, posts, and interactions, ensuring efficient data storage and retrieval.

- Applied object-oriented programming principles and modular architecture to ensure scalability and maintainability.
- **Technologies:** Java, JavaScript, PHP, HTML/CSS, Git, REST APIs

Technical Keywords

Full-Stack Development Backend Development Frontend Development REST API Development Database Design CRUD Operations Object-Oriented Programming Data Structures Software Development Lifecycle (SDLC) Git Version Control

Skills

Programming Languages	Java Python JavaScript PHP
Web Technologies	HTML CSS REST APIs
Frameworks & Tools	Android SDK Git GitHub Linux CLI
Core Concepts	Object-Oriented Programming Data Structures Algorithms Database Design Software Development Lifecycle
Soft Skills	Problem Solving Team Collaboration Communication Independent Project Ownership

Language Skills

Mother tongue(s): Gujarati / Hindi

	Understanding		**Speaking**		**Writing**
	Listening	Reading	Production	Interaction
